

Requirement set scope

Application requirements for MAT-BRG-001 alternatives

DOCUMENT ID
REQ-BRG-APP
EFFECTIVE DATE
2026-07-20
CLASSIFICATION
Synthetic hackathon fixture

REVISION

OWNER
Plant-A Product Engineering

Scope

- Product: ASSEMBLY-A
- Material: MAT-BRG-001
- Review level: requirement-by-requirement
- Evidence must identify source, revision, and page.

Decision semantics

- MATCH requires applicable evidence.
- MISMATCH rejects a hard requirement.
- Missing or insufficient evidence remains UNKNOWN.

Technical requirements

Controlled requirements for substitute review

Requirement register

- REQ-BORE-001 | Bore diameter | = 25 mm | HARD | BEARING-SEAT-25MM
- REQ-LOAD-001 | Dynamic load | >= 14 kN | HARD | BEARING-SEAT-25MM
- REQ-LUBE-TEMP-001 | Lubricant temperature suitability | = SUITABLE | CRITICAL | HIGH-TEMP-LUBRICATION

Evidence rule

- Catalog claims are acceptable only when applicable to the exact candidate revision.
- Generic storage-temperature data does not satisfy lubricant operating suitability.

Release requirement

Production use remains a separate controlled decision

Release gate

- REQ-RELEASE-001 | Plant qualification release | = true | CRITICAL | PLANT-A
- Engineering evidence review is necessary but not sufficient.
- Qualification task approval does not authorize production use.

Related procedure

- Quality_Release_Procedure.pdf revision 3
- Current QMS candidate status record

Humans retain Engineering and Quality release authority.
