

Purpose and authorization

Procedure QUAL-TEMP-001

DOCUMENT ID
SOP-QUAL-TEMP
EFFECTIVE DATE
2026-08-10
CLASSIFICATION
Synthetic hackathon fixture

REVISION
2
OWNER
Plant-A Qualification Laboratory

Purpose

- Generate application-specific evidence for REQ-LUBE-TEMP-001.
- Applies to unqualified bearing candidates proposed for Assembly A.

Authority boundary

- Scheduling or approving this test does not release material for production.
- Only authorized laboratory personnel may record execution results.

Test method

Controlled temperature endurance cycle

DOCUMENT ID SOP-QUAL-TEMP	REVISION 2
EFFECTIVE DATE 2026-08-10	OWNER Plant-A Qualification Laboratory
CLASSIFICATION Synthetic hackathon fixture	

Method

- Install candidate in the representative test fixture.
- Operate at the Assembly A duty point.
- Run for 16 working hours of laboratory time.
- Record temperature, torque, noise, and lubricant condition.

Resource

- Required resource: LAB-TEMPERATURE
- Calendar: weekdays, 08:00 to 16:00 Asia/Jakarta
- Interrupted work resumes at the next available period.

Acceptance and evidence record

Required output for Engineering review

Acceptance criteria

- No lubricant breakdown or leakage.
- Measured temperature remains within the application limit.
- No abnormal torque or noise trend.

Required record

- Candidate ID and lot
- SOP revision
- Start and completion timestamps
- Measured results and reviewer signature
- Disposition: PASS, FAIL, or INCONCLUSIVE

An absent or incomplete result remains UNKNOWN.
